## AR-Filler-System

Drum and Container  
filling system

# The ARTA AR-Filler unit provides safe and easy filling of drums and containers

The filling connection is made by thread (gas-tight) or plug system.

## The AR-Filler has up to 3 connections (3 in 1 principle)

1. product
2. gas / vapour
3. proximity switch (High Level Cut Off)

To avoid foaming of the media (submerged filling option) the AR-Filler can be equipped with a dip pipe, which is can be adjusted to the height of the drum or container.

For highly viscous media we offer an optional heating jacket system for the AR-Filler.

### Connections:

**Container:** Male Threads G2", S56 x 4, S63 x 5, S70 x 6, S160 x7  
 other thread or flange connections on request

**Product:** Male Threads 1/2", 3/4", 1", 1 1/2"  
 other thread or flange connections on request

**Gas / Vapour:** Male Threads 1/2", 3/4", 1", 1 1/2"  
 other thread or flange connections on request

**Proximity Switch:** Female Threads 3/8", 3/4", 1"  
 other thread or flange connections on request

**Materials:** 1.4571 (316Ti), 1.4404 (316L)  
 1.4571 (316Ti), 1.4404 (316L) HALAR coated  
 other materials on request
